Priority Area 2	Promotion of	f Social Inclusion														
	In Egypt, universal health insurance was decided to be introduced in 2018, amid the promotion of the improvement of the quality of healthcare services, in addition to the development of hospitals and other infrastructure, as well as efforts to achieve universal health coverage (UHC). However, the institutional and policy implementation environment for UHC has not been sufficiently developed, and important challenges to achieving UHC have arisen, such as the excessive treatment cost burden on users and the impact of COVID-19. In addition, social inclusion of persons with disabilities in the country has not been sufficiently developed.					through its long experience, support institutional design, human resource development and support for vulnerable groups, as well as provide assistance for infrastructure development and improvement of management and institutions in the health sector. With regard to infrastructure and institutional improvement

	In Egypt, the demand for water resources has been increasing in recent years due to rapid population growth and expansion of agricultural land, and the effective use of water resources in the agricultural sector, which accounts for 95% of the country's total water consumption, is a particularly urgent issue. In addition, many people working in the sector are poor, and raising farmers' incomes and living standards through improving agricultural productivity is an important issue.				re realisation of inclusive growth by helping to correct the imbalance and disparity in urban-rural development
